PROFESSIONAL SUMMARY

Flutter Developer with over 3 years of professional experience building and shipping 10+ live cross-platform mobile applications for iOS and Android, including an AI-powered super app with voice-controlled navigation and AI-based item scanning. Skilled in Dart, Flutter, state management with GetX and Riverpod, REST API integration, and Firebase services (push notifications, chat, real-time data). Experienced in integrating third-party SDKs, including payment gateways (JazzCash, EasyPaisa, PayFast, Stripe, SadadPay, RevenueCat), mapping providers (Google Maps, MapBox, OpenStreetMap), and video/audio calling (VideoSDK). Comfortable owning apps end-to-end — from UI implementation to API integration, testing, and App Store/Play Store deployment — while collaborating closely with designers, backend developers, and clients.

TECHNICAL SKILLS

- State Management: GetX, Riverpod
- Backend & APIs: REST API Integration, Dynamic Links, Firebase
- Firebase: Push Notifications, Realtime Chat, Firebase Services
- Payments & Monetization: JazzCash, EasyPaisa, PayFast, Stripe, SadadPay, RevenueCat (In-App Purchases & Subscriptions)
- Maps & Location: Google Maps, MapBox, OpenStreetMap
- Media & Real-Time: VideoSDK (Live Streaming, Audio/Video Calling), YouTube API
- AI Integration: Voice-Controlled App Navigation, AI-Based Item Scanning & Detail Extraction
- Cloud & Storage: Cloudflare
- Notifications: OneSignal, Firebase Cloud Messaging
- Version Control: Git, GitHub
- Deployment: Google Play Console, App Store Connect

PROFESSIONAL EXPERIENCE

Flutter Developer — IRG Global

March 2025 – Present

- Built Savari — Simplify Your Life, an AI-powered super app for rides, deliveries, vehicle ownership, shopping, and payments, end-to-end from initial development through production release and ongoing maintenance.
- Implemented voice-controlled app navigation, letting users complete tasks hands-free through natural voice commands.
- Built an AI-based item scanning feature that captures an image and automatically extracts item details.
- Integrated multiple payment gateways and mapping providers

Flutter Developer — LetZyno

March 2024 – February 2025

- Develop and maintain cross-platform mobile applications using Flutter and Dart, focused on performance and usability.
- Translate client requirements into functional, production-ready mobile features.
- Integrated multiple payment gateways and push notifications

Flutter Developer — DigiXValley

August 2022 – February 2024

- Designed and implemented mobile applications with advanced features, ensuring a seamless user experience.
- Integrated backend APIs to support efficient, reliable app functionality.
- Integrated multiple payment gateways, push notifications, and Live Streaming

PROJECTS

Savari — Simplify Your Life

- Built an AI-powered super app for rides, deliveries, vehicle ownership, and shopping, from initial development through production release and ongoing maintenance.
- Implemented voice-controlled app navigation, letting users complete tasks hands-free through natural voice commands.
- Built an AI-based item scanning feature that captures an image and automatically extracts item details.
- Integrated multiple payment gateways — JazzCash, EasyPaiza, PayFast, and Stripe — for in-app transactions.
- Integrated multiple mapping providers — Google Maps, MapBox, and OpenStreetMap — for location and ride-related features.

[App Store](#) | [Play Store](#)

Foodage — Find Food and Review

- Implemented post creation and editing along with a custom InstaPicker-like widget for media uploads.
- Integrated Cloudflare for media storage and Google Maps for restaurant discovery.
- Built business-side functionality for coupons, challenges, and restaurant management.
- Added dynamic links for posts and restaurants to improve shareability.
- Built a full-featured chat system using Firebase, supporting media and document sharing.

[App Store](#) | [Play Store](#)

Barre Studio — Class Scheduling

- Developed a fitness class scheduling app with a user-friendly UI.
- Integrated APIs for dynamic data fetching and management.
- Implemented SadadPay for secure payment processing.
- Used OneSignal for push notifications.

[App Store](#) | [Play Store](#)

Deen Minder — Quran & Prayer Times

- Contributed to app design, Quran recitation, and Adhkar audio playback via API.
- Implemented prayer time alerts, custom reminders, and Azan notifications.
- Developed a quiz system with rewards, a referral system, and Qibla direction.
- Added sharing options for Quranic verses and Adhkar.

[App Store](#) | [Play Store](#)

TakeHair — Book a Hairdresser

- Contributed to app design and API integration for real-time salon/barber booking.
- Implemented in-app audio calling using VideoSDK, plus a chat feature.
- Integrated push notifications using Firebase.
- Added dynamic links for barber profiles.

[App Store](#) | [Play Store](#)

TakeHair for Partner — Barber App

- Contributed to app design and API integration for schedule and booking management.
- Implemented audio calling with VideoSDK and in-app chat functionality.
- Integrated push notifications and dynamic links for barbers via Firebase.
